BABY EVERGREENS

Not all of the fun of gardening is in making a large color display. Don't you like to plant baby plants and watch them grow just for the fun of it?

Well now, here are some of the finest varieties of evergreens in one-year baby plants. They are potted, well established and will be shipped with the pot ball carefully wrapped so they will be sure to grow for you. Just plant them in a nicely prepared little bed and water them well. That is all you need to do and watch them develop. When they are grown you will have some of the finest landscape varieties available. And the price—

Price on all varieties listed: 30c each; or any six of your choice for \$1.25, postpaid.

12 trees (not less than 3 of a kind), for \$2.00, postpaid.

25 trees (not less than 3 of a kind), for \$3.85, postpaid.

50 trees (not less than 5 of a kind), for \$7.00, postpaid.

100 trees (not less than 5 of a kind), for \$13.00, prepaid.

PYRAMID ARBOR-VITAE. Tall, slender pyramid form. Dark green.

WOODWARD'S GLOBE ARBOR-VITAE. Dwarf, globe-shaped dark green.

BERCKMANN'S DWARF GOLDEN BIOTA. Dwarf, egg-shaped, bright golden color.

IRISH JUNIPER. Tall, slender, gray-green.

PFITZER JUNIPER. Spreading, dwarf bluish green.

ANDORRA JUNIPER. Spreading, dwarf, light green. Purple in winter.

JUNIPER SCOPULORUM (Blue Colorado Juniper). Slender compact growth of pleasing shade of blue-green. Very hardy and desirable. Likes sunshine and does best in clay soil.

JAPANESE TAXUS or YEWS.

Among the finest dwarf trees. These trees thrive in shade where few other varieties will grow. Color is a dark glossy green and each variety makes a beautiful specimen plant. You will always prize the Yew trees on your grounds.

TAXUS CUSPIDATA. Dwarf and compact. Grows into a round bush form and can be trimmed to any desired shape.

TAXUS CAPITATA. More upright. Grows into a dense cone-shaped little tree. Beautiful for entrance plantings and marking corners.

TAXUS HICKSI. A narrow column, very compact and dark glossy green. Makes a beautiful accent specimen.

TAXUS MEDIA HEDGE. Very low growing in bush form and very dense. A beautiful variety for hedges or low compact specimen.

TAXUS REPANDENS. This is the dwarf spreading Yew. Fine for planting under windows or any place where a dwarf spreading tree is needed.

TRANSPLANTED EVERGREENS

Different varieties than those listed on reverse side. Pines, Firs, Spruces, Hemlock, etc. The varieties listed are all fine landscape varieties. These trees have been transplanted and have a wonderful root system. They will be packed in damp sphagnum moss and carefully wrapped so they will reach you in fine growing condition. These trees may be planted in permanent positions now or they may be planted in a row (two feet apart), to develop into fine symmetrical landscape specimens and transplanted into permanent positions later.

The price on these trees is the same as listed on reverse. These varieties can be ordered along with the potted varieties in making up your assortment.

Special prices will be quoted on larger quantities for reforestation and erosion control purposes. We can also supply Pitch Pine, Bull Pine, White Pine and Jack Pine. Write for special prices.

BALSAM FIR. Beautiful dark green, soft needles with the fragrant balsam scent. Compact and symmetrical. Firs like a moist but well-drained soil and do well in the shade of the house.

DOUGLAS FIR. A beautiful blue-green shade. Compact and symmetrical. One of the most satisfactory and hardy evergreens.

CONCOLOR FIR. Many of these have a decided bluish color. Very hardy and beautiful color and form. Thrives in shade and is one of the best.

NORWAY SPRUCE. The ideal Christmas Tree. Dark green in color and thrives in any well-drained soil. Grows fairly rapid and is much used for landscape purposes, also windbreaks, and we suggest that you plant some with the idea of growing your own Christmas trees. These trees when grown for Christmas trees can be sold at a good profit.

COLORADO BLUE SPRUCE. Very colorful. The colors will vary on this variety from a light green to a decided bright blue. In a dozen trees you will probably get twelve different shades. All beautiful. Very hardy and an ideal landscape tree.

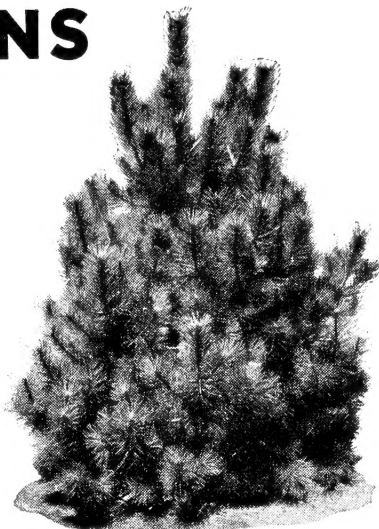

AUSTRIAN PINE. Long needles of dark green. This tree thrives in very poor soil and under adverse conditions. Grows dense and compact and into a well-formed tree.

SCOTCH PINE. One of the most beautiful Pines. Blue-green in color, symmetrical and very hardy. A fine landscape tree.

RED PINE. Soft needles of bright green. Very pretty, very hardy. Makes a very striking tree and fine for Christmas trees and landscape.

AMERICAN ARBOR-VITAE. Flat-leaf Cedar. This tree makes a compact growth and makes an ideal hedge tree. They can be sheared into a formal hedge without difficulty or injury or can be used as specimens. They like sunshine and a well-drained soil.

HEMLOCK. A beautiful variety for shaded places. Shining green foliage and beautiful graceful branching habit. Very hardy and can be used as a hedge also. Can be sheared with difficulty or can be grown larger into specimen trees. One of the finest.
